Professional Summary

I like building things that actually work, not just compile. A traineeship at Technical Hub turned my classroom understanding of the MERN stack into shipped features, and the habit stuck: CAMPX, a car rental platform, even an AI-based vehicle noise detector on the side. Currently a CS student at Aditya University, always chasing the next problem worth solving.

Technical Skills

Languages:	Java, Python, JavaScript, SQL
CS Fundamentals:	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks
Web Development:	React.js, Node.js, Express.js, HTML, CSS, REST APIs
Databases:	MongoDB, MySQL
Tools & Platforms:	Git, GitHub, VS Code, Postman
Interests:	Software Development, Problem Solving, Artificial Intelligence, Open Source Technologies

Experience

Full Stack Development Trainee	Nov 2024 – May 2025
--------------------------------	---------------------

Technical Hub

- Developed web applications using React.js, Node.js, Express.js, and MongoDB.
- Built responsive user interfaces and integrated backend APIs.
- Worked in collaborative project environments following software development practices.
- Used Git and GitHub for version control and project management.

Student Software Developer	Aug 2023 – Jan 2024
----------------------------	---------------------

Aditya Polytechnic Colleges

- Developed a Student Academic Monitoring System used for tracking academic performance.
- Designed database schema and implemented CRUD operations.
- Collaborated with faculty members to gather requirements and improve usability.

Projects

CAMPX – Academic Communication Platform

React.js, Node.js, Express.js, MongoDB

- Developed a centralized academic communication platform for announcements, opportunities, events, and notifications.
- Implemented role-based authentication using JWT.
- Built dashboard modules for students, faculty, and administrators.

Car Rental Web Application

MongoDB, Express.js, React.js, Node.js

- Developed a full-stack vehicle booking platform.
- Implemented user authentication and booking workflows.
- Designed responsive UI for desktop and mobile users.

Student Academic Monitoring System

PHP, MySQL, HTML, CSS

- Built a database-driven application to monitor student performance.
- Developed reporting and data management functionalities.
- Improved record tracking and accessibility for faculty.

Research & Innovation

- MitraAI Smart Clock – MSME Ideathon participant.
- AI-based Vehicle Noise Detection System.
- Participated in startup and innovation project initiatives.

Education

Bachelor of Technology (B.Tech), Computer Science & Engineering	2025 – 2028 (Expected)
---	------------------------

Aditya University

Andhra Pradesh, India

CGPA: 7.6

Diploma in Computer Science & Engineering	2022 – 2025
---	-------------

Aditya College of Engineering and Technology

Andhra Pradesh, India

CGPA: 9.1

SSC (Secondary School Certificate)	2022
------------------------------------	------

B.V.M Aided High School

Andhra Pradesh, India

Percentage: 83.4%

Achievements & Leadership

- Solved 300+ Data Structures & Algorithms problems on coding platforms.
- Selected for State-Level Technical Fests & Hackathons.
- Participated in Google Developer Groups (GDG) events.
- Built and deployed multiple full-stack applications.
- Participated in technical workshops focused on AI, Full Stack Development, and Software Engineering.
- Led a student team in developing and delivering a Student Academic Monitoring System.
- Collaborated on software projects using Git and GitHub in team-based environments.
- Participated in hackathons, coding contests, and technical workshops.
